

GMAD Batter Clear Drumhead

The exclusive 12mil film of the G PLUS combined with an improved EMAD™ damping system delivers increased low-end, punch, and power. It is ideal for heavier hitters looking for a solid sound and more life to the head but prefer the feel of a single-ply.

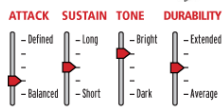

Genera HD Drumhead

The Genera HD yields an aggressive rimshot and balanced response. This durable two-ply head (7.5mil external, 5mil internal) with 2mil overtone control ring barks live, yet is ideal for the studio.

G2 Coated Drumhead

With a fat attack and open sustain, the G2 is a two-ply head (7mil each) featuring extraordinary consistency and durability. It offers a great blend of depth, sustain, focus, and attack. It makes any snare sizzle and crack.

Onyx 2-ply Drumhead

The Onyx tom heads are designed with two plies of 7.5 mil film that will deliver enhanced durability while making the drums cut live. A micro-clear coating gives the Onyx heads a matte black appearance, produces more low-end and a punchier attack.
